Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant request that Examiner explain the 102 rejection of claim 1 over Boyce. The examiner explained that the claim only required generating two fields in response to an input bitstream, which Boyce meet, although one of the fields generated by Boyce is blank. Examiner informed applicant that claim language as to the contents of the two fields would overcome the 102 rejection. Examiner and applicant discussed the application of Kim, and its combination with Boyce. Examiner directed the applicant to portions of Boyce that related to the generation of new picture and slice headers. Applicant inquired if the examiner knew of any changes that could be made to the application to further prosecution. The examiner informed the applicant the he was not aware of any at that time. .
